

Question 1: Login Form with Validation (10 Points)

Requirements

Create a **Login Form** that validates user input and displays a welcome message on successful login.

HTML Form Fields (2 Points):

1. **Username** (text input)
2. **Password** (password input)
3. **Login** button

Validation with JavaScript (5 Points):

- **Username:** Must not be empty. Display an error message below the field if invalid. (2 Points)
- **Password:** Must have at least 6 characters. Display an error message below the field if invalid. (2 Points)
- On successful login (both fields valid), display:
`Welcome, [Username]!` below the form. (1 Point)

CSS Styling (2 Points):

1. Style the form for a neat, professional look (centered layout, padding, border).
2. Highlight invalid fields with a red border.

JavaScript Feature (1 Point):

- If the login fails (invalid inputs), clear the fields and display `Invalid credentials. Please try again.`

UI Mockup

```
-----
|                               |
|               Login Form     |
|                               |
|-----|
| Username: [_____]           |
|                               |
| Password: [_____]           |
|                               |
|               [ Login ]      |
|                               |
```

```
Welcome, JohnDoe!
```

Question 2: To-Do List with JavaScript (10 Points)

Requirements

Build a **To-Do List** application where users can add, view, edit, and delete tasks.

HTML Structure (3 Points):

1. **Task Input:** A text input field to enter a task.
2. **Add Task** button: Adds a new task to the list.
3. **Task List:** A dynamic list of tasks.

JavaScript Functionality (6 Points):

1. **Add Task:** Add a new task to the list when the Add Task button is clicked. **(2 Points)**
2. **View Tasks:** Display all tasks in a list format. **(1 Point)**
3. **Edit Task:** Allow users to click an Edit button next to a task, modify it in the input field, and save changes. **(2 Points)**
4. **Delete Task:** Provide a Delete button next to each task to remove it from the list. **(1 Point)**

CSS Styling (1 Point):

1. Style the input field, buttons, and task list for a user-friendly design.
-

UI Mockup

Task Management Layout:

```
-----
|                               To-Do List                               |
|-----|
| Task: [ _____ ] [ Add Task ]                                     |
|-----|
|                               List of Tasks                             |
|-----|
| 1. Buy groceries [Edit] [Delete]                                     |
|-----|
```

| 2. Complete homework [Edit] [Delete] |

Submission Instructions

1. Provide separate **HTML**, **CSS**, and **JavaScript** files for each question.
2. Ensure code is tested and functional on desktop browsers.
3. Submit files in a zipped folder labeled: `HTML_CSS_JS_Exam_<YourName>.zip`.
